

HYKLEEN

cold sterilant

Broad Spectrum

Environmentally Friendly

Biodegradable

Ease of use

Not Carcinogenic

PUREMEDITECH GROUP

HYKLEEN

Concentrated Cold Sterilant / High Level Disinfectant

HyKleen is a stabilised Peracetic acid product that offers state of art cold sterilisation. Its careful formulation makes a simple and safe fast acting cleaning agent: being biodegradable is more environmentally friendly than traditional methods.

Principle

The concentration of Peracetic acid in HyKleen is sufficient not only to react with the cell walls proteins, but also penetrate into the interior of cells, oxidising all protein contents. The Peroxide content is an efficient cleaning agent and sterilant.

Application

HyKleen is an effective sterilant formulated for use after dilution for many applications, for example, high purity water systems, medical and laboratory equipment. It is mostly used in Dialyzer Reprocessing System. Consult with your machine manufacturer about "Instruction For Use"

Features

- A cold sterilant that is glutaraldehyde free
- More effective than formaldehyde, ethanol and sodium hydroxide (which are disinfectants that kill only most bacteria and some spores but not all microorganisms)
- Effective against non-tuberculous mycobacteria including HIV (associated with AIDS), hepatitis viruses and microorganisms when used as a sterilant

Environment

- Discharges to drain where it breaks down into oxygen, acetic acid and water
- Shelf life is 12 months after manufacture

Package

- Safety degasification system with splash-proof cap
- Packing size: 10 ltr. bottle
