

HDRO TM SR

MW Eco Pretreatment System

Consistent and Safe

Innovative Design

User-friendly

PUREMEDITECH SDN BHD

HDRO SRTM MW Eco Pretreatment System

The MW Eco Pretreatment important system in Reverse Osmosis (RO) System to comply the requirements for reverse osmosis. It needed as fouling can be prevent and increases the RO system lifetime. The system complied with AAMI grade water. The system is designed to meet all current standards for dialysis quality water.

Feature and Benefits

Consistent and safe

- Registered with Medical Device Authority
- Continuous pressure monitoring
- Dry run protection
- Low inlet pressure alarm and pump shutdown
- RCCB & Circuit breakers for 240 V components

User friendly

- Easy accessible sample valve
- Automatic backwash cycle
- Sampling valve for soft and dialysis water

Innovative design

- Individual bypass for every Column
- Automatic switch pump
- Stainless steel skit
- High quality components used

Technical Specifications

Model	MW 1465	MW 1665	MW 1865	MW 2162
Pre-treatment for	HDRO SR 10 & 15	HDRO SR 20 & 25	HDRO SR 30 & 35	HDRO SR 40
Raw Water Supply	50 L/min	55 L/min	80 L/min	100 L/min
Water pressure	0-100psi (0-14.5 Bar)			
Power supply	240VAC; 50Hz; 0.5Amp			
Feed Water	City water < TDS 10			
Quality	Depend on inlet water quality. The system is design to meet the standards of the MOH guidelines and AAMI standards for hemodialysis. RO water comply with AAMI RD62			

Medical Device Authority Registration
No. : GC6953820-50190
